Education

Maulana Azad Memorial College (CLUJ) — Jammu, J&K, India
Bachelor of Computer Applications (BCA) — *Aug 2024 – May 2027*

Technical Skills

Languages: JavaScript, Python, TypeScript, C++, Java, SQL
Frontend: Next.js, React.js, Redux Toolkit, Vite, Tailwind, CSS, HTML
Backend: Node.js, Express.js, REST APIs, Socket.io, JWT
Databases: MongoDB, PostgreSQL, MySQL
AI / GenAI: LangChain, Groq API, Mistral AI, LLM Integration
Cloud & DevOps: AWS (EC2, S3, Lambda, ECS), Docker, Nginx, CI/CD, GitHub Actions
Networking: OSIM, TCP, UDP, IP & MAC Addressing, ARP, DHCP, ARP, DNS, Subnetting
CS Fundamentals: Data Structures & Algorithms, OOPs, DBMS, REST Architecture
Tools: Git, GitHub, Postman, VS Code

Experience

Full Stack Web Developer Intern — Jun 3, 2026 – Jul 1, 2026
CodTech IT Solutions — *Hyderabad, Telangana (Remote)*

- Built and deployed backend on Render with persistent WebSocket connections via Socket.io, and frontend on Vercel with zero-downtime CI.
- Integrated MongoDB Atlas with Mongoose schemas across all projects, designing efficient data models for users, sessions, and content.
- Independently debugged and fixed broken codebases, improving reliability and adding features like JWT auth, mood tracking, and live collaboration.

Projects

CollabBoard | *React, Node.js, Socket.io, MongoDB, Tailwind CSS* — 2026

- Real-time collaborative whiteboard and notes app supporting multiple users in shared rooms with live cursor sync and sticky notes.
- Implemented Socket.io room-based namespacing for isolated sessions; persisted notes to MongoDB with per-room retrieval.
- Deployed backend on Render (WebSocket-friendly) and frontend on Vercel; responsive UI built with Tailwind CSS v4.

Retroleaf | *React, Node.js, Express, MongoDB, JWT, Tailwind CSS* — 2026

- Full-stack digital journal app with a retro CRT-inspired aesthetic, JWT-based authentication, and per-user private entries.
- Built mood tracking (emoji-based) and streak analytics dashboard showing journaling consistency over time.
- Designed Mongoose schemas for users and journal entries; secured all routes with middleware-level JWT verification.

CodeSync | *React, Vite, Monaco Editor, Socket.io, Node.js, Express* — 2026

- Real-time collaborative code editor where multiple users share a live coding session synced via Socket.io.
- Integrated OnlineCompiler.io API for in-browser multi-language execution: Python, Java, C++, and TypeScript.
- Tracked active users per room using a server-side `Map` keyed by socket ID; applied a custom dark "Shinobi" Tailwind theme.

Achievements

Solved **200+ DSA problems** on LeetCode, covering arrays, strings, recursion, linked lists, trees, and dynamic programming.
